

We'll give you
30,000 reasons
to upgrade.

Trade your existing instrument - even non-working or non-Olympus models - for \$30,000 in discounts on a new Olympus system.

Olympus will help you upgrade your existing confocal system to a FluoView® FV1000 with SIM technology, our new self-contained FV10i, or our incredible FV1000 Multiphoton system, and we'll give you \$30,000 to do it. You can upgrade your FV300, FV500, FVX, or any laser scanning confocal system. The new FluoView systems will be equipped with Windows® 7 operating systems, which is completely replacing Windows® XP. If you have been thinking about getting a system with more capability, more versatility or if you just wish you had the most current technology, upgrade now.

Contact your local Olympus Sales Representative for more details or call 1.800.387.0437.
